NOTES AND ADDENDA

The exploration data map shows only the most important minerals found at each site. All the minerals noted are listed in the mineral occurrences or the drill hole data.

On the maps, only the areas for which work has been submitted to the Ministry are shown and thus a company may hold, or have held in the past, more ground than is shown.

Two mines produced silver in the past and two others shipped small amounts of silver.

The township was closed to staking in 1978 due to the Bear Island Indian Caution.
